<u>AP CSP</u> Unit 1 – Part 2 – Test Review

Name: _____

- 1. Define the following terms:
 - IETF –
 - Internet –
 - Net Neutrality -
 - Internet Censorship –
 - IP Address –
 - Packets –
 - Protocol –
 - Router –
 - TCP -
 - DNS –
 - HTTP –
 - URL –

2. Describe the redundancy of routing between two points on the Internet.

3. Give one example of how computing has a global effect – both beneficial and harmful – on people and society.

4. Describe at least one vulnerability of DNS and how an attack on it works.

5. Explain how layers of protocols allow the Internet to function (drawing a picture may help).
